

Python Imports and Functions

Graham West

Python Standard Library:

1 math (numpy is better)

- 1.1 sin, cos, tan (asin, sinh, ...)
- 1.2 exp, log, erf
- 1.3 ceil, floor
- 1.4 isinf, isnan
- 1.5 degrees, radians
- 1.6 pi, e, inf, nan

2 statistics (numpy is better)

- 2.1 mean, median, mode
- 2.2 stdev, variance, covariance, quantile
- 2.3 linear_regression

3 random (numpy is also good)

- 3.1 seed
- 3.2 randint, randrange
- 3.3 random, uniform
- 3.4 choice, sample
- 3.5 shuffle

4 pickle

- 4.1 dump, load

5 csv (just use numpy)

6 threading, multiprocessing (parallel processing)

7 time

- 7.1 sleep
- 7.2 time

8 os

- 8.1 listdir, getcwd, mkdir

9 sys

- 9.1 argc, argv

Third-party Libraries:

1 matplotlib.pyplot

1.1 show

1.2 plot, scatter, imshow

1.3 subplots

1.4 formatting stuff

2 numpy

2.1 everything from math, statistics, and random and more (sometimes with different names)

3 scipy

4 scikit-learn

5 pandas

6 seaborn
